

Summer School 2017 « Exploring French Terroirs »

OBJECTIVES

Participate in an intensive, interdisciplinary program that combines French history and culture, geography and pedology, food production. You will gain valuable insight into French agriculture and cultural landscapes and discover what makes French agriculture unique. Through the optional work placement program, you will gain practical, international experience while earning college credits.

CREDITS

Up to 8 US Credits: 1 US Credit/week and 4 US Credits for the one-month field placement.

ADMISSION REQUIREMENTS

Juniors, Seniors or Master degree students in Agricultural Engineering, Agricultural Economy, Agronomy, Landscape Ecology, Human Ecology, or Geography from an accredited institution.

For non-native speakers of English: 785 TOEIC, 567 TOEFL paper (or 227 TOEFLcibt, 87 TOEFLibt), 6.5 IELTS.

French: not required but basic French would be useful for the field experience option.

Classes

STUDY IN FRANCE

The "Grandes Ecoles" are unique to France. They were created in the late 18th century in order to offer outstanding scientific education to the country's future engineers. UniLaSalle, founded in 1854, belongs to this tradition. Studying on our campus will not only give you access to excellence in education; you will also have the opportunity to live in the country that invented "savoir-vivre", the art of living well. The Picardy region, home of UniLaSalle, is well known for its beautiful villages and its inspiring gothic cathedrals. No wonder France is the most visited country in the world. Did you know that? Known for its gastronomy, wines and cheeses, France is a large country of amazing geographical variety. You will meet people who are proud of their cultural heritage, their lovely countryside, and their quiet towns and fine restaurants.
